

Business Requirement Document

A Business Requirement Document (BRD) is usually created during project initiation and is often prepared jointly by business stakeholders, business analysts, and data analysts. In many analytics projects, the data analyst maintains and updates the analytics-related sections because they translate business needs into measurable data requirements.

Here is an industry-standard BRD template maintained by a data analyst.

Business Requirement Document (BRD)

Project Information

Project Name: Sales Performance Analytics Dashboard

Client Name: ABC Company

Prepared By: Data Analyst Name

Date: DD/MM/YYYY

Version: 1.0

1. Project Overview

Purpose

The purpose of this project is to develop a sales analytics dashboard that provides insights into sales performance, customer behavior, and revenue trends to support business decision-making.

2. Business Problem Statement

The client currently lacks a centralized reporting system for monitoring sales performance. Existing reports are generated manually, leading to delays and inconsistencies in business insights.

3. Business Objectives

Objectives of the project:

- Improve visibility into sales performance
- Monitor revenue trends

- Identify high-performing products
 - Analyze customer purchasing behavior
 - Reduce manual reporting effort
-

4. Scope of Project

In Scope

- Sales data analysis
- Customer analysis
- Revenue reporting
- Dashboard development
- KPI reporting

Out of Scope

- Predictive modeling
 - Customer recommendation systems
 - External market analysis
-

5. Stakeholders

Stakeholder	Role	Responsibility
Client Manager	Business Owner	Project approval
Sales Manager	End User	Requirement validation
Data Analyst	Analyst	Data analysis and reporting
BI Developer	Dashboard Developer	Dashboard creation

6. Data Requirements

Data Source	Description
-------------	-------------

Sales Database Sales transaction details

Customer Database Customer information

Product Database Product details

Required fields:

- Customer ID
- Product ID
- Sales Amount
- Quantity
- Order Date
- Region

7. Key Performance Indicators (KPIs)

KPI	Description
Total Revenue	Total sales generated
Sales Growth %	Monthly revenue growth
Average Order Value	Revenue per order
Customer Retention Rate	Returning customer percentage
Top Products	Highest selling products

8. Functional Requirements

1. System shall display total sales.
2. System shall provide monthly trend analysis.
3. System shall allow filtering by region.
4. System shall allow filtering by product category.
5. System shall provide drill-down capability.

9. Non-Functional Requirements

- Dashboard load time should be less than 5 seconds.
 - Reports should refresh daily.
 - Data accuracy should be maintained at 99%.
 - Access should be role-based.
-

10. Assumptions and Constraints

Assumptions:

- Data sources are available.
- Source data is accurate.

Constraints:

- Limited historical data available
 - Data refresh frequency restrictions
-

11. Deliverables

- Requirement document
 - Data preprocessing document
 - KPI document
 - Dashboard report
 - User Acceptance Testing report
-

12. Approval
