

Business Requirement Document (BRD)

Project Information

Project Name: E-Commerce Revenue and Profitability Analysis

Client Name: Amazon

Prepared By: Chintala Anitha

Date: DD/MM/YYYY

Version: 1.0

1. Project Overview

Purpose

The purpose of this project is to develop an interactive Power BI dashboard that provides insights into revenue performance, profitability, customer purchasing behavior, product performance, and return trends to support business decision-making.

2. Business Problem Statement

The client currently lacks a centralized reporting system for monitoring revenue, profitability, product performance, and customer behavior. Existing reporting processes are manual, leading to delays, inconsistencies, and limited visibility into business performance.

3. Business Objectives

Objectives of the project:

- Improve visibility into revenue and profitability performance.
 - Monitor monthly revenue trends.
 - Identify top-performing and low-performing products.
 - Analyze customer purchasing behavior and payment preferences.
 - Monitor product return patterns.
 - Reduce manual reporting effort through dashboard automation.
-

4. Scope of Project

In Scope

- Revenue analysis
- Profitability analysis
- Product performance analysis
- Customer behavior analysis
- Return analysis

- Dashboard development
- KPI reporting

Out of Scope

- Predictive modeling
- Recommendation systems
- Competitor analysis
- Real-time data integration

5. Stakeholders

Stakeholder	Role	Responsibility
Business Manager	Business Owner	Project approval
Sales Manager	End User	Requirement validation
Data Analyst	Analyst	Data analysis and reporting
BI Developer	Dashboard Developer	Dashboard creation

6. Data Attributes/Fields

Data Source	Description
Sales Database	Sales transaction details
Customer Database	Customer information
Product Database	Product details

ATTRIBUTES:

- Order ID
 - Order Date
 - Customer ID
 - State
 - Category
 - Product
 - Quantity
 - Unit Price
 - Revenue
 - COGS
 - Shipping Cost
 - Profit
 - Discount %
 - Return Flag
 - Payment Method
-

7. Key Performance Indicators (KPIs)

KPI	Description
Total Revenue	Total revenue generated
Total Profit	Total profit generated
Total Orders	Total number of orders
Average Order Value	Average revenue per order
Profit Margin %	Overall profitability percentage
Top Products	Highest revenue-generating products
Top States	Highest revenue-generating states

8. Functional Requirements

1. System shall display total revenue and profit KPIs.
 2. System shall provide monthly revenue trend analysis.
 3. System shall allow filtering by year, state, category, and payment method.
 4. System shall provide category-wise revenue and profit analysis.
 5. System shall display top-performing products.
 6. System shall provide state-wise sales analysis.
 7. System shall analyze payment method preferences.
 8. System shall provide return analysis.
 9. System shall support interactive filtering and drill-down capability.
-

9. Non-Functional Requirements

1. Dashboard load time should be less than 5 seconds.
 2. Reports should refresh daily.
 3. Data accuracy should be maintained at 99%.
 4. Dashboard should provide interactive user experience.
 5. Access should be role-based.
-

10. Assumptions and Constraints

Assumptions:

- Historical e-commerce data is available.
- Source data is sufficiently accurate for analysis.
- Revenue values are calculated after discount adjustments.
- Users have access to Power BI.

Constraints:

- Dataset contains missing values and inconsistencies.
- Analysis is limited to historical transaction data.

- No real-time integration is available.
 - External market factors are not considered
-

11. Deliverables

- Business Requirement Document (BRD)
 - Messy E-Commerce Data Model
 - Cleaned E-Commerce Data Model
 - Interactive Power BI Dashboard
 - Business Insights
-

12. Approval

Business Questions

1. Which product categories contribute the highest and lowest revenue?
2. How has revenue changed over time across different months?
3. Which states generate the highest revenue for the business?
4. Which product categories are the most profitable?
5. What is the overall profit margin of the business?
6. Which products generate the highest revenue and profit?
7. Which payment methods are most preferred by customers?
8. What is the average order value across all transactions?
9. What percentage of orders are returned?
10. Which products have the highest number of returns?
11. How do product returns impact overall business profitability?
12. What are the key factors driving business performance?
